Woolery, M., 65

Yamada, J., 276
Young, J., 103

SUBJECT INDEX

Adolescent barriers questionnaire (ABQ)
  concerns about pain management among adolescents with cancer, 220-232
Adolescents
  changes in body image experienced by adolescents with cancer, 200-209
  concept of suffering in children and adolescents with cancer, 92-102
  concerns about pain management, 220-232
  discussing difficult issues with patients and parents (editorial), 175
effect of clinic-based health promotion education on perceived health status and health promotion behaviors, 326-334
examination of physical activity behaviors in a sample of adolescent cancer survivors, 135-142
nurse practice issues regarding sperm banking in adolescent male cancer patients, 182-188
personal Web home pages of adolescents with cancer: self-presentation, information dissemination, and interpersonal connection, 152-161

SUBJECT INDEX

Adolescent barriers questionnaire (ABQ)
  concerns about pain management among adolescents with cancer, 220-232
Adolescents
  changes in body image experienced by adolescents with cancer, 200-209
  concept of suffering in children and adolescents with cancer, 92-102
  concerns about pain management, 220-232
  discussing difficult issues with patients and parents (editorial), 175
effect of clinic-based health promotion education on perceived health status and health promotion behaviors, 326-334
examination of physical activity behaviors in a sample of adolescent cancer survivors, 135-142
nurse practice issues regarding sperm banking in adolescent male cancer patients, 182-188
personal Web home pages of adolescents with cancer: self-presentation, information dissemination, and interpersonal connection, 152-161

perspectives of social support by adolescents with cancer, 122-134
relationships of age and gender to hope and spiritual well-being among adolescents with cancer, 189-199
transitioning to survivorship, 335-343
Advanced disease
examination of fatigue, 305-310
Age differences
relationships of age and gender to hope and spiritual well-being among adolescents with cancer, 189-199
Aspergillus
serial *Aspergillus* monitoring in bone marrow transplant patients, 300-304
Attention disorders
role of cognitive remediation in childhood cancer survivors experiencing neurocognitive late effects, 321-325

Body image
changes in body image experienced by adolescents with cancer, 200-209
Bone marrow transplantation
enteral nutrition, 103-110
serial *Aspergillus* monitoring in patients, 300-304
Brain tumors
new family management style framework tool, 19-27

CAM therapies, *see* Complementary and alternative medicine (CAM)
Chemotherapy
children receiving chemotherapy at home: perceptions of children and parents, 276-285
discussing difficult issues with patients and parents (editorial), 175
nurse practice issues regarding sperm banking in adolescent male cancer patients, 182-188
tumor necrosis in pediatric osteosarcoma, 176-181
Clinical application
of family management styles, 28-31
Cognitive remediation
role in childhood cancer survivors experiencing neurocognitive late effect, 321-325
Complementary and alternative medicine (CAM)
future directions of CAM research in pediatric oncology, 265–268
initiatives in the children's oncology group and the role of the pediatric oncology nurse, 261-264
matching the right therapy with the right patient, 254-257
use in pediatric oncology, 244-253, 258-260
Conflict
between families and health care professionals, 82-91
Consensus statements
use of family management style framework, 36-37
Constipation assessment scale (CAS)
for use in pediatric oncology, 65-74
Coping strategies
changes in body image experienced by adolescents with cancer, 200-209

Cryopreservation
nurse practice issues regarding sperm banking in adolescent male cancer patients, 182-188

Distress
potential for developing a routine screening and assessment program to evaluate (editorial), 121

Education
factors affecting acceptability to young cancer patients of a psychoeducational video game about cancer, 269-275
Emotional distress
potential for developing a routine screening and assessment program to evaluate (editorial), 121
End-of-life care
for the patient with escalating and intractable symptoms, 45-51
Enteral nutrition
bone marrow transplantation, 103-110
Exercise
examination of physical activity behaviors in a sample of adolescent cancer survivors, 135-142

Families
new family management style framework tool, 19-27
perspectives of social support by adolescents with cancer, 122-134
sources of conflict between families and health care professionals, 82-91
Family management styles (FMLs)
challenge of moving from conceptualization to measurement, 12-18
clinical application, 28-31
new tool with potential to assess families who have children with brain tumors, 19-27
proceedings of APON's sixth annual state of the science and practice preconference session (guest editorial), 11
use in family intervention research, 32-35
Fatigue
examination in advanced childhood cancer, 305-310
Fever
minimizing complications in postoperative patients, 75-81
Flow cytometry
clinical implications of minimal residual disease, 38-44

Galactomannan
serial *Aspergillus* monitoring in bone marrow transplant patients, 300-304
Gender differences
relationships of age and gender to hope and spiritual well-being among adolescents with cancer, 189-199

Health care providers
sources of conflict between families and health care professionals, 82-91
Health promotion education
effect on perceived health status and health promotion behaviors of adolescent and young adult cancer survivors, 326-334

Home care
children receiving chemotherapy at home: perceptions of children and parents, 276-285
Hope
relationships of age and gender to hope and spiritual well-being among adolescents with cancer, 189-199

Instrument development
challenge of moving from conceptualization to measurement, 12-18

Late effects
role of cognitive remediation in childhood cancer survivors experiencing neurocognitive late effects, 321-325

Male infertility
discussing difficult issues with patients and parents (editorial), 175
nurse practice issues regarding sperm banking in adolescent male cancer patients, 182-188
Mind-body therapies
matching the right therapy with the right patient, 254-257
Minimal residual disease (MRD)
understanding clinical applications, 38-44
Mucositis
CAM therapies, 258-260

Nasogastric tubes
enteral nutrition and bone marrow transplantation, 103-110
Nausea
CAM therapies, 258-260
Needs
young children with cancer during their initial hospitalization, 210-219
Neurocognitive deficits
role of cognitive remediation in childhood cancer survivors experiencing neurocognitive late effects, 321-325
Nutritional status
enteral nutrition and bone marrow transplantation, 103-110

Observational studies
needs of young children with cancer during their initial hospitalization, 210-219
Off therapy
transitioning to survivorship, 335-343
Osteosarcoma
tumor necrosis, 176-181

Pain assessment
assessing procedural pain, 311-320
Pain management
concerns about pain management among adolescents with cancer, 220-232
Personal Web home pages
adolescents with cancer: self-presentation, information dissemination, and interpersonal connection, 152-161
Phenomenological studies
lived experience of adult survivors of childhood cancer, 143-151
Physical activity behaviors
examination of in a sample of adolescent cancer survivors, 135-142
Polymerase chain reaction
clinical implications of minimal residual disease, 38-44
Postoperative patients
minimizing complications related to fever, 75-81
Procedural pain
assessment in children, 311-320
Prognostic factors
tumor necrosis in pediatric osteosarcoma, 176-181

Social support
perspectives by adolescents with cancer, 122-134
Sperm banking
discussing difficult issues with patients and parents (editorial), 175
nurse practice issues regarding sperm banking in adolescent male cancer patients, 182-188
Spiritual well-being
relationships of age and gender to hope and spiritual well-being among adolescents with cancer, 189-199
Suffering
concept of suffering in children and adolescents with cancer, 92-102
Survivorship
adolescents transitioning to, 335-343
effect of clinic-based health promotion education on perceived health status and health promotion behaviors of adolescent and young adult cancer survivors, 326-334
lived experience of adult survivors of childhood cancer, 143-151
role of cognitive remediation in childhood cancer survivors experiencing neurocognitive late effects, 321-325
tumor necrosis in pediatric osteosarcoma, 176-181
Symptom distress
concept of suffering in children and adolescents with cancer, 92-102
Symptom management
CAM therapies, 258-260

Tumor necrosis
pediatric osteosarcoma, 176-181
Typologies
family management styles, 32-35

Video games
factors affecting acceptability to young cancer patients of a psychoeducational video game about cancer, 269-275
Vomiting
CAM therapies, 258-260

Young children
needs of young children with cancer during their initial hospitalization, 210-219
